Network-optimized power and enhanced manageability!

IBM

IBM PC 300PL with Intel Pentium III or Pentium II Processor

Highlights

Easy to manage
The IBM® PC 300PL is equipped with the highest level of IBM's standards-based Universal Manageability features so it can be easily managed from the moment it arrives on your loading dock. Integrated 10/100 Ethernet with Wake on LAN® technology and the new, easier-to-use LANClient Control Manager™ software[1] can help save significant time and money by eliminating routine visits to each system.

Universal Management Agent
IBM's new Universal Management Agent™[2] (UMA) is client software that helps you easily integrate our PCs into your chosen management environment. A set of plug-ins, UMA Plus, further extends your management capabilities by incorporating leading IBM desktop tools including SMART Reaction™, PC-Doctor™, and CoSession Remote® 32 into UMA.

Innovative Asset ID™ technology
Each IBM PC 300PL includes a radio-frequency ID tag that makes it easier to deploy and inventory your systems. You can record information about an end user, including identifying a software image, without even taking the system out of its carton[3].

Ingenious Alert on LAN
These systems are equipped with Alert on LAN™, a product of the IBM/Intel® Advanced Manageability Alliance, which can notify you when a system has been

tampered with or removed from the network, even if it is powered off. Alert on LAN also monitors system voltage, fan speed and temperature and can notify you prior to a potential failure.

NEW!

Improved performance and value
The IBM PC 300PL is available with the latest generation of high-performing Intel processors operating at speeds up to 550MHz[4] and a choice of powerful and speedy AGP graphics. Select models are equipped with an AGP 2X SR9 with S3 Savage4 or Matrox Millennium G200 Video Card that enable high screen resolutions and refresh rates, advanced 3D rendering and enhanced full-motion video. A host of other valuable features, including integrated Ethernet, audio and an IBM ScrollPoint™ mouse are included—all at a highly competitive price.

The IBM PC 300PL offers innovative, standards-based features that make system and asset management easier than ever before, so you can concentrate on business. You get all the built-in functionality you need, together with IBM's unbeatable quality, at highly competitive prices.
